About This Content

The Wild West is all about swagger - and so are these costume themes. This Skin Pack is a great way to unlock all of 8 of the current alternative costumes, and at the same time support the developers ability to continue expanding Secret Ponchos!

These skins are crafted with a lot of care: for each you'll see a new sculpted model, and hand painted textures. The "Grit" costumes present the characters in the heat of action – sleeves rolled up and extra gear strapped on.

INCLUDED:

- Phantom Poncho "Grit" alternative costume
- Kid Red "Grit" alternative costume
- Killer "Grit" alternative costume
- Matador "Grit" alternative costume
- Deserter "Grit" alternative costume
- Gordo "Grit" alternative costume

**Bonus Phantom Poncho "Remorse" alternative costume

**Bonus Kidred "Remorse" alternative costume

man.. this game is boring af. i dont recommend it. especially for its price! you get 66 puzzles and you have to finish them by yourself. if youre stuck and dont know what to do, there us no clue or whatever. when you finish the game, nothing happens. also it is pretty hard to get to previous levels. dont buy it!. This train is not very good, Sounds are so bad that they could just have left it without sound. Model is not very good at all.. Only played for a short time, but so far so good. Graphics, music, SFX all very nostalgic and true to the genre.. Excellent, had a lot of fun in this short game. But devs please take this game forward and add more to it. So we can come back and play some more.. Seeing that the developer did the last update a year ago, there seems to be little hope that this game gets good.
It has some potential, but too many flaws.

Pros:

- nice graphics
- decent voice acting
- some good jump scares

Cons:

- overused effects like specular lighting
- night too dark
- boring level design (the first house is just scattered with random objects)
- terrible(!) written journal messages
- boring "search for key and open doors"-errands
- player character doesn't react to environment at all (blood pools etc.)

Don't spend more than 20€ for this until there has been a major update.

DAMNIT ITS THE GRAMAR MURDERERR, I CAN HEAR HE COMING AT FOR ME !!! Great hidden object game, good story, very interesting. It is easy to obtain all achievements and have a good time while playing. I recommend to buy it from a bundle or with a discount.. who the heck put the onions in my room seriously ... Totally changing my review this is a fantastic game and one of the best vr games i have played! The depth is incredible! 6 characters all with unique characters backgrounds. I have just finished the first chapter and after following each character anyone of them could be the killer. If each chapter is the same length as the first, there should be around 8 hours gameplay. So far it is story rich and emersive. I still think the control system hinders this game a lot. I would love to put this on my list to introduce people who have never experienced VR, but unfortunately the control system deters me from doing that. You do get used to the controls but i still get myself out of position and find myself struggling to get a good vantage point and sometimes by the time i do, i have missed crucial plot points and need to rewind. This for me would be a 10 out of 10 game it such a unique experience! However, due to the clunky controls it loses a point and i give it a 9/10. Dont let controls deter you though this is money well spent. YAY! Another game! Much harder than the first one, which either way is appreciated. I do enjoy seeing the pictures and what is commonly found in Italy and originated there. The Lasagna is spelled as "lasagne", but now that is my favorite way of pronouncing it! And of course this game helps you take your mind off things and just enjoy the challenges. Thank you for making this game! :)))

Extra notes: Went back and played it again. Achievements are working! The text on everything is off...BUT! It makes it really fun/vfunny -> such as: "tut_ice blocks". Heh heh. Still good and challenging. Woo!. Based off of the reviews I was excited to try this one, graphics are good, mechanics are decent. Unfortunately this game is based around arena PvP unless you want to "practice" with bots the whole time. Never once was I able to join a multi-player game, even after waiting 10 - 15 minutes at a time. I did post on the discussion board asking if this was normal and at the time of this writing ~3 business days later I have not received a response.

I would suggest the developer offer a few weekends free play so that more people can experience the game and hopefully build a reasonable player base.

Otherwise, I would not recommend this game, there is no storyline and fighting against bots is not hugely difficult after your first 15-30 minutes of getting the hang of the game.

Call of Duty Mac Edition

Yes i know wen you have A mac Or linux And you friend say Hey Dude you want to play COD And your Say No i have a fuc*ing mac book and feeling like a idiot

Good Feed Back: I have Have A mac book And That i hate are you not can play cod

Thx for reading <33333333333333333333333333333333
see you later <33333333333333333333333333333333. I shot anime girls and they liked it.

They stepped on me and I liked it.

10/10 everyone is happy. A really interesting otome game, where you are on your way to be a master pastry chef! At first I found it a little confusing, but to be honest I was surprised of how good where the tests you take at the academy and the character's routes. It's very entertaining and I like the fact that you actually need certain statistics to advance not only with the story but to gain your favorite boy's heart! Because just "picking" the correct answer would be boring.
Highly recommend trying this one, I got it on sale and I wasn't expecting to play it for so many hours!! Loved it!. I really love this game, it is very easy to play and has very simple mechanics, the only challenge is the circuits. Every circuit is different and gets you to think. I never found myself finding it too hard or too easy, even if i had to spend a while on some levels.. very very bad game 1V10!!!. This game is an emotional rollercoaster.. No Left-Handed mode = Unplayable. Also, enemies don't react when hit. Bullets don't land where red dot is pointing on the assault rifle. Terrible. Instant refund for me.. Drive through buildings and ♥♥♥♥ up green cars while pew pew pewing enemy gangs.. Runs poorly, uninspired, and really bad interface designing.

This is literally just a trading card farming game.. like it a lot
